CARGOHUB

# RFS Control Tower

A centralized solution for effortless **RFS Management** — from scheduling and planning to real-time tracking of trucks and AWBs.

Who We Are

Cargohub provides innovative digital platforms and IT services for airlines, ground handlers, forwarding agents, and trucking companies. Driving operational excellence and empowering customers to deliver outstanding air cargo services.

Core Features

Scheduling and Planning

Optimize truck capacity with a planning tool designed specifically for efficient RFS planning, maximizing operational efficiency and resource utilization.

Truck Ordering & Coordination

Streamline truck ordering from a centralized overview, using fixed rates or the free market for flexibility.

Real-Time Monitoring & Visibility

Monitor trucks, flight and AWBs in real-time from a centralized dashboard, ensuring complete visibility and swift response to delays or disruptions.

Benefits

Centralized System

- Centralized RFS management
- Reduced manual work
- Simplified process management
- Consistent data access

Cost Savings

- Optimize truck capacity utilization
- Streamlined truck ordering
- Identify inefficiencies
- Tracking of cost related metrics

Real-Time Monitoring

- Truck & AWB tracking
- Real-time status updates
- Connection time insights
- Centralized monitoring dashboard

Data-Driven Insights

- Customized KPI chart dashboards
- Identify process bottlenecks
- Monitor stakeholder performances
- Improve decision-making
